

MISSISSIPPI STATE DEPARTMENT OF HEALTH

Effective Date: 3/2/2023
Public Water System: Town of Terry [0250025] Located in: Hinds County

This affects approximately 1,305 customers who are served by the Town of Terry in Hinds County.

Town of Terry [0250025] has issued a **Boil-Water Alert** for customers who receive their drinking water from their water supply located in Hinds County.

Water system officials notified the Mississippi State Department of Health of a system wide pressure loss due to one or more-line breaks.

When a distribution system loses pressure, contaminants can siphon back into the water. Public health officials consider any system that loses pressure contaminated until tests prove otherwise. Health officials strongly recommend that all water be boiled vigorously for one minute before it is consumed.

The water system will be notified of the tests results.

Checklist for Safe Water Use

DO NOT

- Do not drink tap water while the water system is under a boil water advisory.
- Do not drink from water fountains in parks, public or private buildings that receive water from the affected system.
- Do not use ice unless it has been made with boiled water. Freezing will not necessarily kill harmful bacteria.
- Do not use tap water to make drinks, juices, or fountain soft drinks.

DO

- Wash your dishes in boiled water, or use paper plates for the next few days.
- Wash your fruits and vegetables with boiled or bottled water since they may have been exposed to affected water from grocery store sprayers.
- Wash your hands and bathe as usual. Bathing is safe as long as no water is swallowed.
- Brush your teeth with boiled or bottled water.
- Cook with tap water if the food will be boiled for at least one minute.

AND REMEMBER:

570 East Woodrow Wilson • Post Office Box 1700 • Jackson, MS 39215-1700

Equal Opportunity in Employment/Services

- Properly chlorinated water in swimming pools is safe.
- Fish in aquariums are not affected.

Bringing water to a rolling boil for one minute will inactivate all major types of harmful bacteria.

When your boil-water notice is lifted:

- **Flush faucets** for a total of 10 minutes to introduce system water throughout house plumbing.

Example:

- 1 faucet — run for 10 minutes
- 2 faucets — run both for 5 minutes
- 3 faucets — run each for 3-4 minutes

Flush any faucet a **minimum of 2 minutes** to ensure clearing of the line serving the faucet.

- **Discard any drinks**, ice, food, etc, made during the boil water notice.
- **Rewash** any food or drink contact items (knives, forks, plates, etc.) with "cleared" system water.
- **Check water filters** (in faucets, refrigerators and elsewhere) and replace if necessary.
- **Do not use water from your hot water heater** for drinking until several exchanges of the tank have occurred.
- **Run dishwasher** through a cycle or two before washing dishes.
